

BUDDIES PROJECT SESSION 7

Types of Evaluation

Thursday, February 15, 2024

A bit of **HOUSEKEEPING**

Recording the didactic
presentations and
BUDDIES updates

Closed captioning
available, if needed

Please keep cameras
on, if possible

IT / Tech issues?
Let Chad know in chat
or phone:
(207) 992-7325

Today's **AGENDA**

1. Presentation on Goal-Specific Theory of Change
2. Small Group Activity
3. Presentation on Types of Evaluations
4. BUDDIES Updates
5. Wrap Up & Next Steps

GOAL-SPECIFIC THEORY OF CHANGE

5 YEAR BIG PICTURE

GOAL SPECIFIC

THEORY OF CHANGE

What?

Road map

Chain of causation

Causal chain

Project hypothesis

Conceptual map

Theoretical rationale

Framework for action

Project theory

Theoretical underpinning

Project framework

Mental model

Blueprint for change

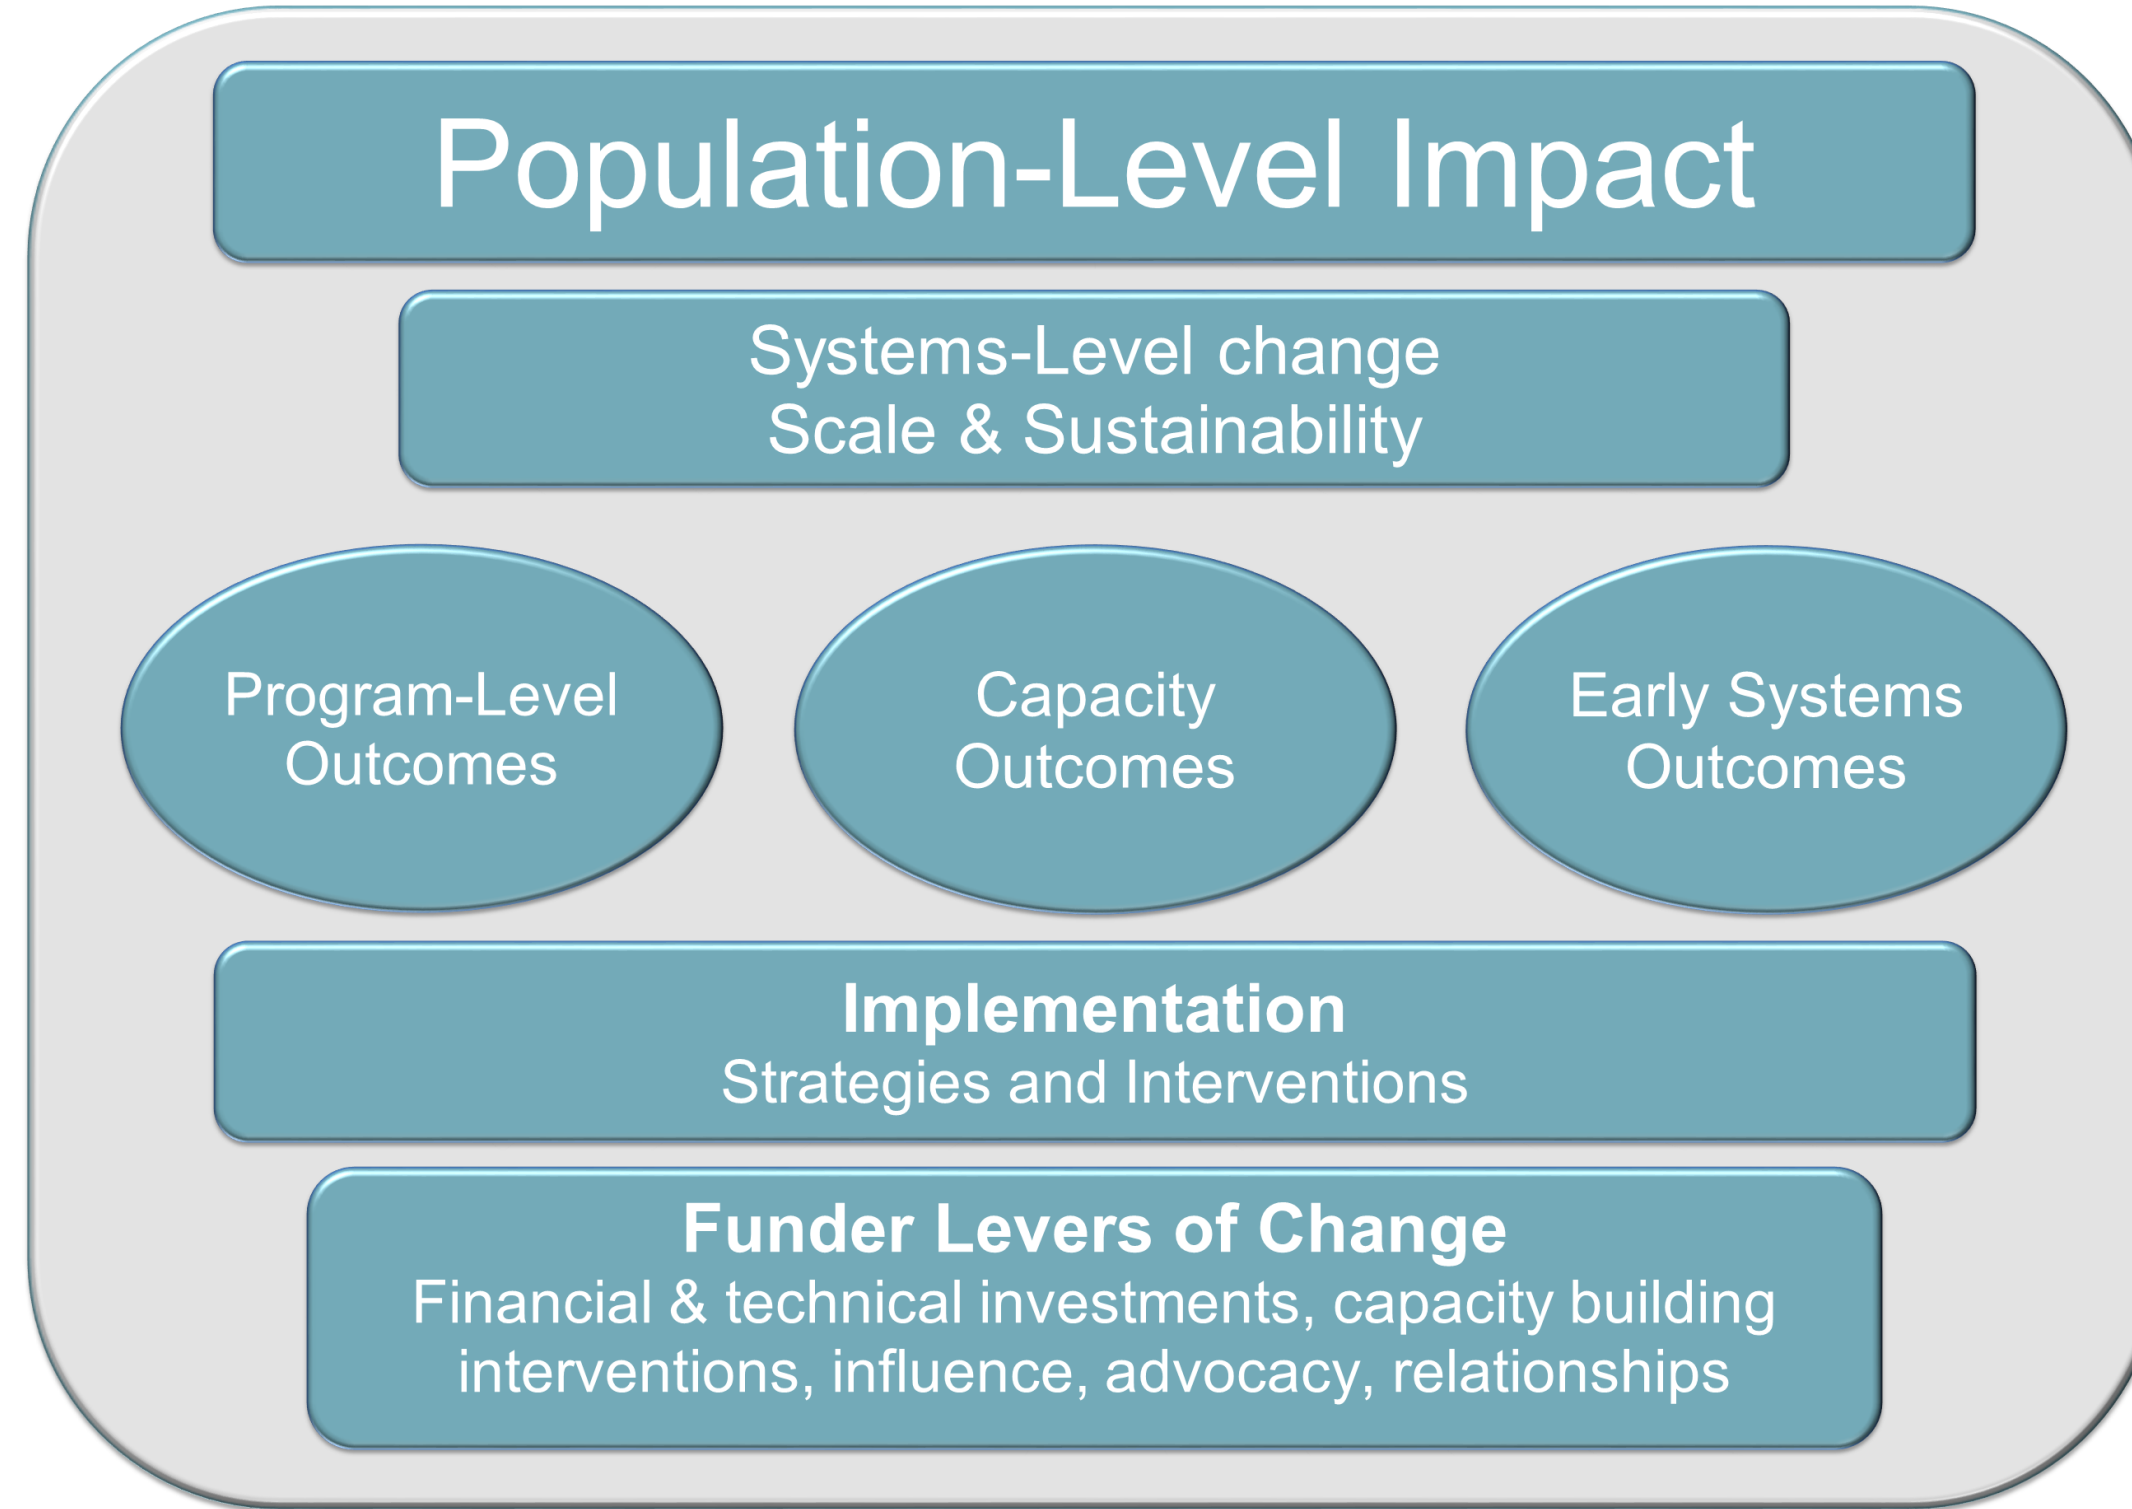

Pathways map

Theory of change

A systematic and visual way to present the perceived relationships among the resources you have to operate the project, the activities you plan to do, and the changes (results) you hope to achieve.

Political, Social, Economic Context

Population-Level Impact

Systems-Level change
Scale & Sustainability

Program-Level
Outcomes

Capacity
Outcomes

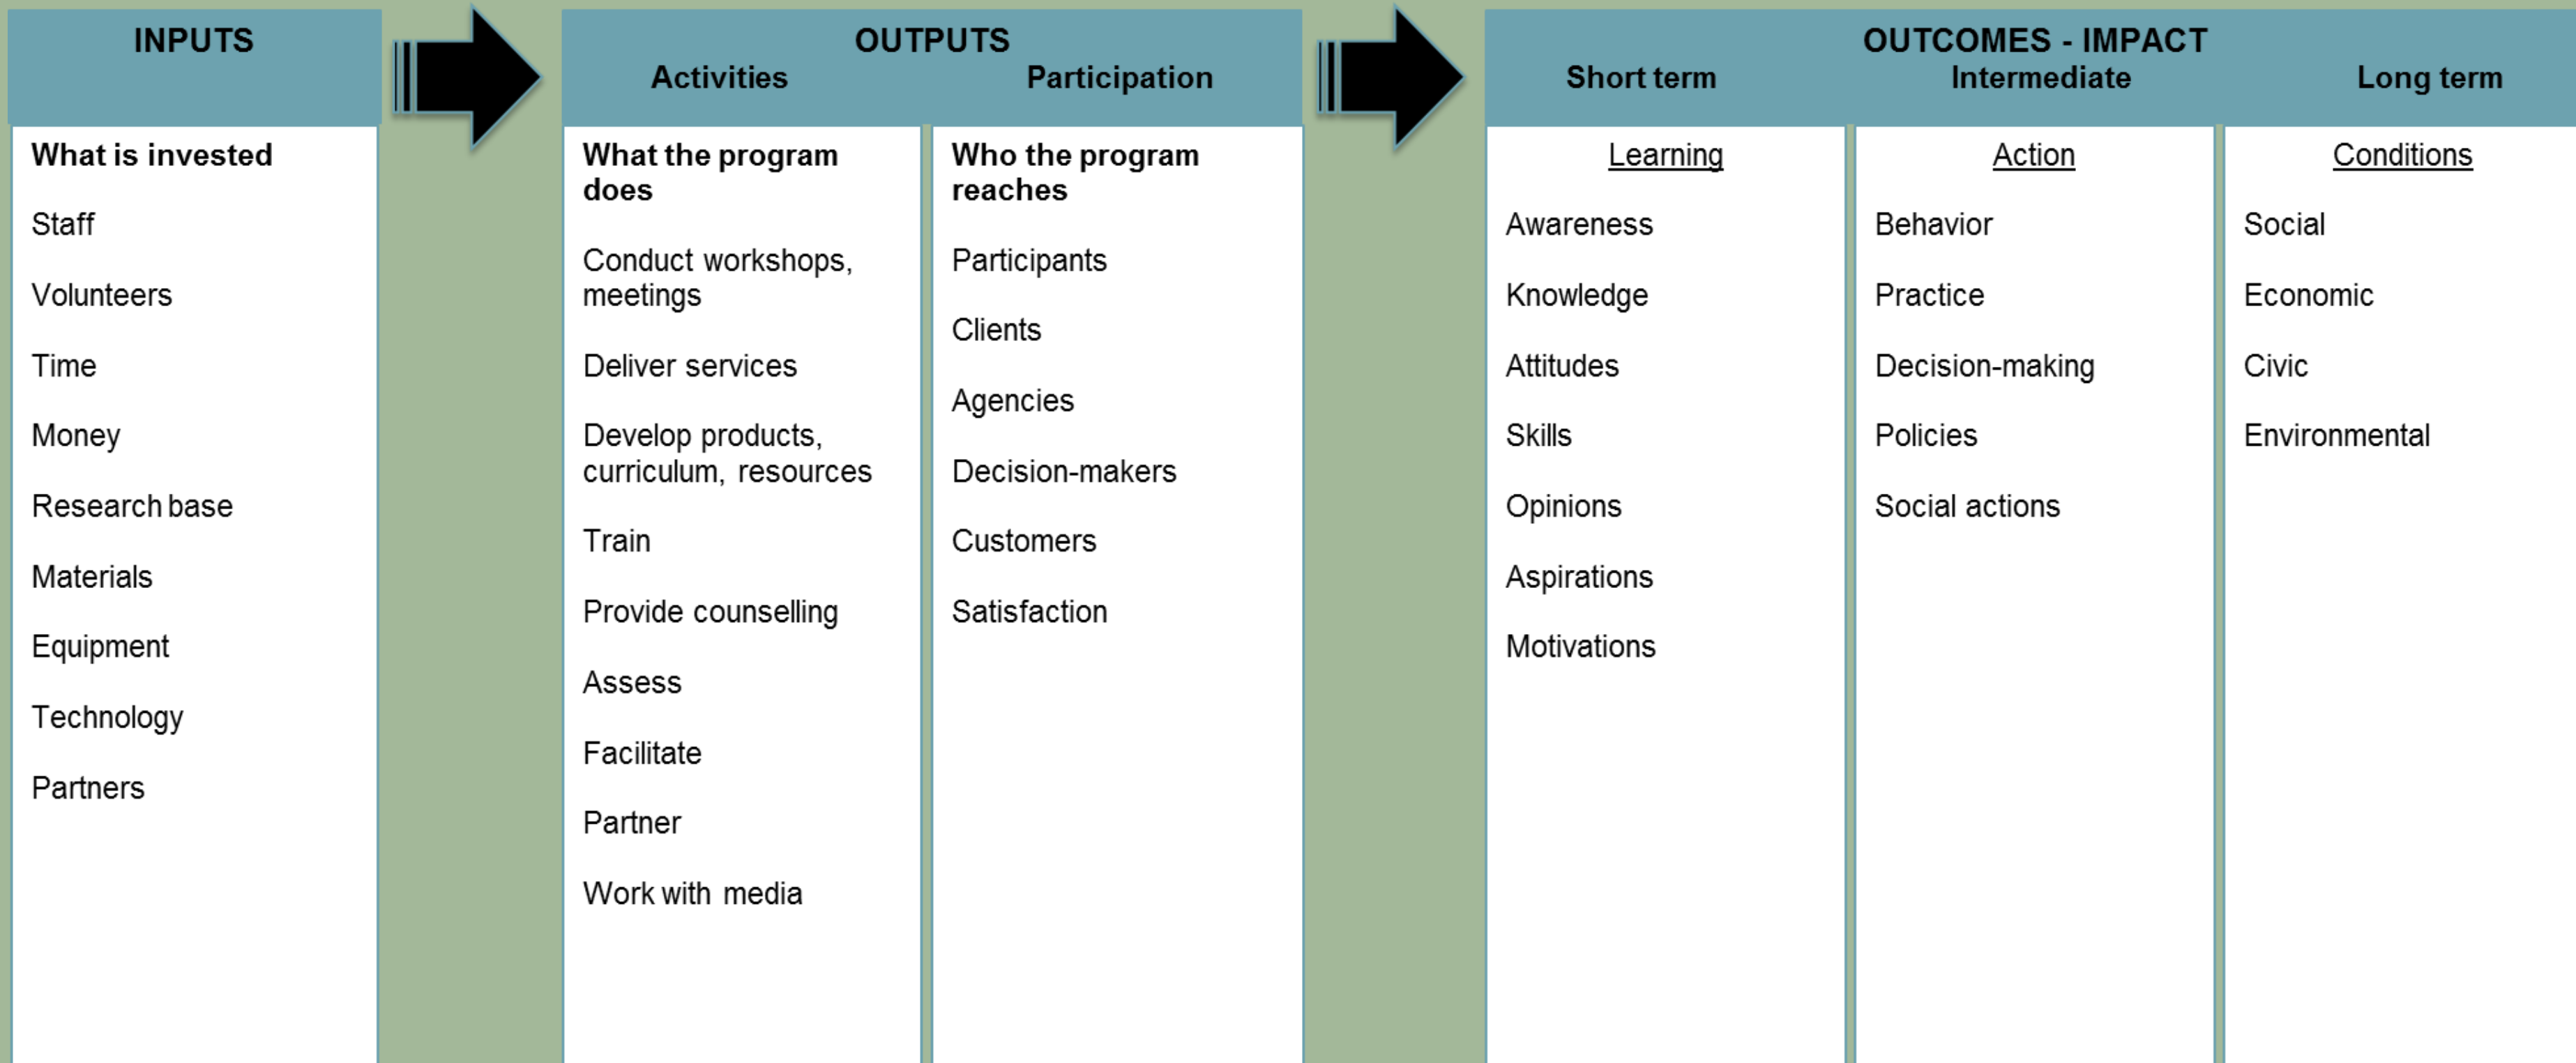

Early Systems
Outcomes

Implementation
Strategies and Interventions

Funder Levers of Change
Financial & technical investments, capacity building
interventions, influence, advocacy, relationships

Baseline Conditions

Political, Social, Economic Context

IMPLEMENTATION

PLANNING

WHO IS INVOLVED?

Membership comprised of individuals and groups that can effect change in individuals, professional groups, systems, or policies.

Measured through:

- Membership composition
- Level of involvement
- Recruitment

HOW DO THEY INTERACT?

Partnership structure and procedures are in place to facilitate collaboration, action, and improvement.

Measured through:

- Demonstrated commitment to self-assessment
- Defined roles and responsibilities
- Partnership structure
- Group dynamics
- Maintenance of interest in collaborating / contributing
- Leadership
- Shared vision
- Perceived benefits / drawbacks

WHAT DO THEY DO?

- Coordinate and integrate activities
- Contribute resources
- Prioritize activities
- Maintain partnerships and build collaborations
- Communicate key messages to audiences and stakeholders
- Increase knowledge and build skills
- Identify potential funding / resources
- Implement interventions

WHAT ARE THE RESULTS?

Partnerships and relationships are institutionalized and sustained and / or there is an improved climate for change.

Measured through:

- Public policy changes or policy / procedural changes within partner organizations
- New or strengthened external relationships / networks
- Synergy / coordination / increased credibility and access to key populations
- Identified or garnered resources for future

DISTAL OUTCOMES

Measured through intervention indicators and surveillance

SMALL GROUP ACTIVITY

REPORT OUT

TYPES OF EVALUATION

Types of **EVALUATION**

FORMATIVE EVALUATION

PROCESS EVALUATION

OUTCOME EVALUATION

FORMATIVE EVALUATION

WHAT?

- Evaluation that ensures a project is feasible and appropriate before being fully implemented
- Exploratory – can help highlight needs and/or context to inform project activities (e.g., needs assessment)

WHY?

- Provides information to shape and refine the project
- Can help determine workplan activities and programmatic targets

WHEN?

- During project development and/or modification
- Before finalizing project details and activities
- Continuously throughout the project

SO WHAT?

- Maximize project success and desired outcomes
- Improve project design and/or delivery
- Save time, resources, & funds by identifying issues before they arise

PROCESS EVALUATION

WHAT?

- Evaluation that determines whether a project is being implemented as intended
- Could be focused on internal processes (e.g., partnerships/collaboration) or assessing systems of implementation (e.g., training approach, delivery system)

WHY?

- Review the implementation of the project to ensure on track to meet desired outcomes
- Can help monitor progress the project is making towards achieving workplan targets

WHEN?

- Once the project has been set and implementation has begun
- Continuously throughout implementation

SO WHAT?

- Strengthen ability to report on project by ensuring activities are linking back to theory of change and intended outcomes/targets
- Identify unforeseen implementation challenges that can be addressed early in the project

OUTCOME EVALUATION

WHAT?

- Evaluation that measures progress towards intended outcomes (short-term and intermediate)
- With long-term projects (5+ years), can begin to assess impacts among the population of focus

WHY?

- Assess the project's effects among the population of focus
- Can help determine if the project has reached the intended workplan targets

WHEN?

- Once a project has been implemented
- Once the project has reached individuals from the population of focus

SO WHAT?

- Show the overall effectiveness of the project
- Provide evidence of positive project outcomes to inform future work

questions?

COMMENTS?

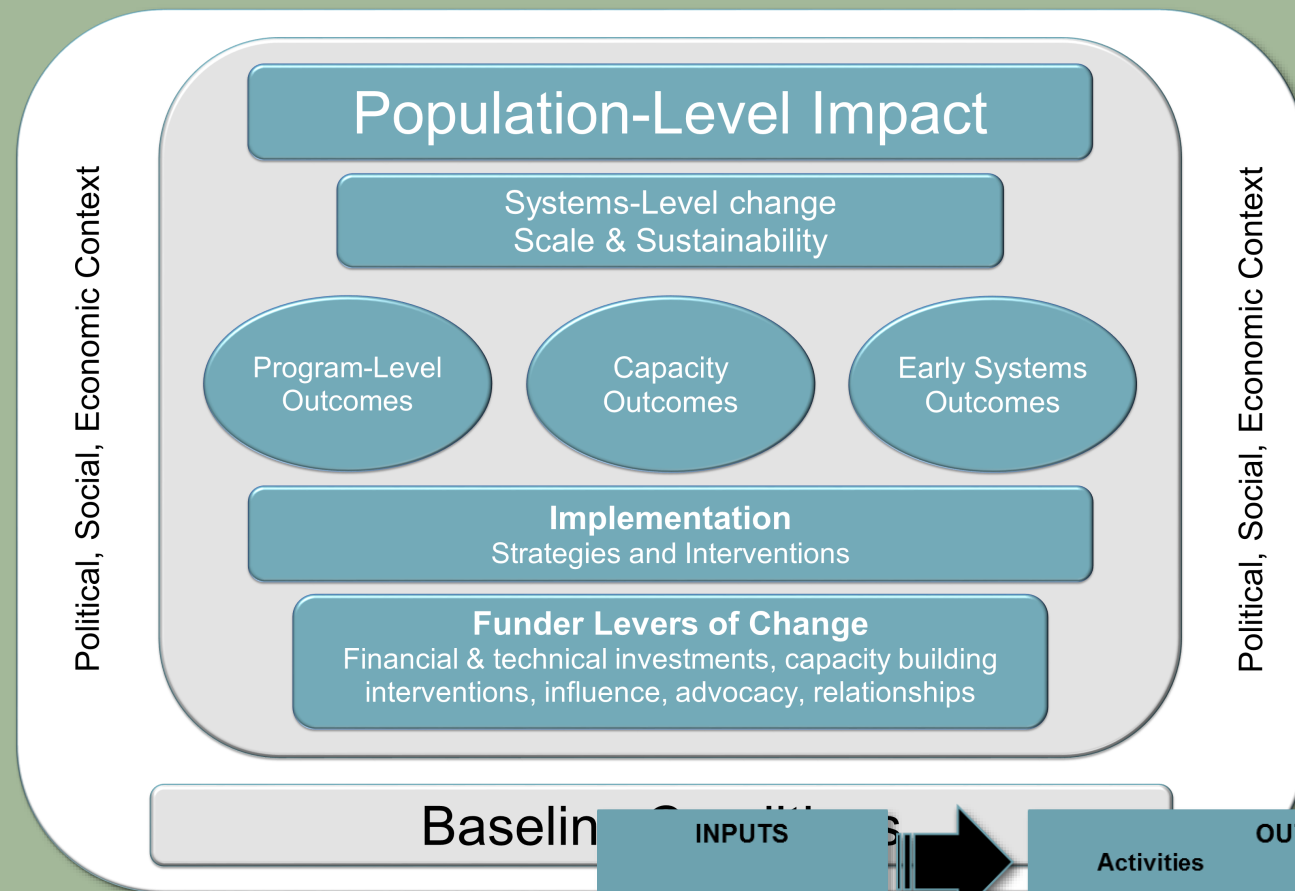

clarifications?

2024 BUDDIES SESSION TOPICS

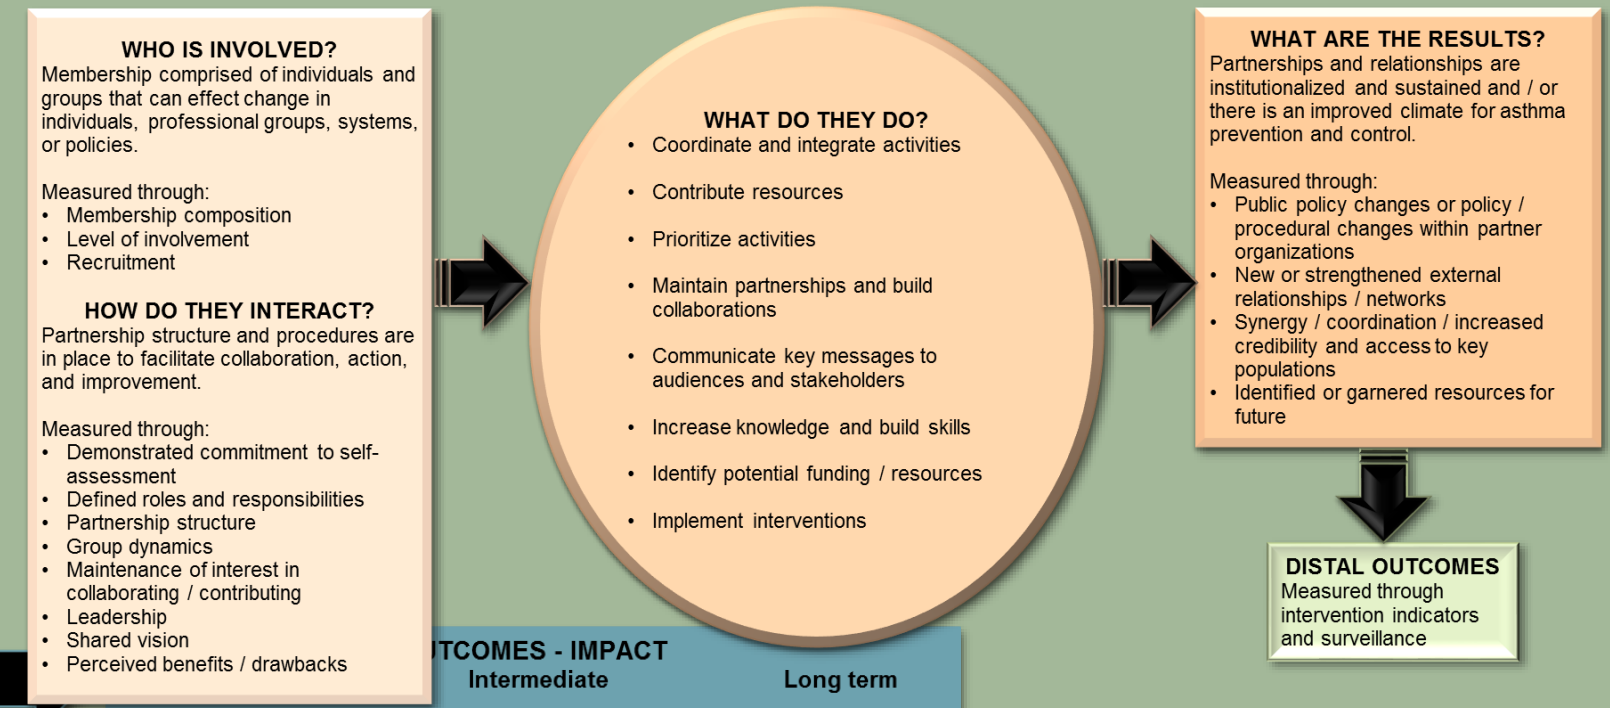

| SESSION | DATE | TOPIC |
|---------|------------------------|---|
| 8 | April 18 | Study Designs |
| 9 | July 22 (in-person) | Evaluation in the Project Management Cycle |
| 10 | September 19 | Traditional Data Collection Methods & Tools |
| 11 | November 21 | Innovative Data Collection Methods & Tools |

THEORY OF CHANGE TEMPLATES

EVALUATION RESOURCES

Types of Evaluation

Once you've determined which program activities in your logic model should be evaluated, you can begin to identify the types of evaluation you can conduct.

What are the most common types of evaluation?

There are several types of evaluations that can be conducted. Some of them include the following:

- **Formative evaluation** ensures that a program or program activity is feasible, appropriate, and acceptable before fully implemented. It is usually conducted when a new program or activity is being developed or when an existing program is being adapted or modified.
- **Process/implementation evaluation** determines whether program activities have been implemented as intended.
- **Outcome/effectiveness evaluation** measures program effects in the target population by assessing the progress toward outcomes or outcome objectives that the program is to achieve.
- **Impact evaluation** assesses program effectiveness in achieving its ultimate goals.

Process Evaluation determines whether program activities have been implemented as intended and resulted in the desired outputs. You may conduct process evaluation periodically throughout the life of your program and start by reviewing the activities and output components of the logic model (i.e., the left side).

Results of a process evaluation will strengthen your ability to report on your program and use information to improve future activities. It allows you to track program information related to Who, What, When and Where questions:

- To whom did you direct program efforts?
- Where did your program activities take place?
- What has your program done?
- What are the barriers/facilitators to implementation of program activities?
- When did your program activities take place?

Outcome Evaluation measures program effects in the target population by assessing the progress in the outcomes the program is to address. To design an outcome evaluation, begin with a review of the outcome components of your logic model (i.e., the right side).

Some questions you may address with an outcome evaluation include:

- Were medical providers who received intensive STD training more likely to effectively counsel, screen and treat patients than those who did not?
- Did the implementation of STD counseling in community-based organizations result in changes in knowledge, attitudes, and skills among the members of the target population?
- Did the program have any unintended (beneficial or adverse) effects on the target population(s)?
- Do the benefits of the STD activity justify a continued allocation of resources?

For more information and examples, see Step 3.1 in the Practical Use of Program Evaluation among STD Programs manual.
